

Rixens Enterprises Inc

Rixens Enterprises Inc offers a complete range of products, including controller kits, furnaces and parts, plumbing kits and parts, and heated floors. Specializing in hydronic furnaces, they provide top-quality furnace exhaust parts and airtronic furnaces, ensuring efficient heating solutions. Their plumbing coolant pumps are designed for optimal performance, particularly in Mercedes Sprinters. Whether you're in need of durable furnace components or advanced heating systems, Rixens Enterprises Inc delivers reliable solutions for all your heating and plumbing needs.

S3 Hydronic D5E CS 12V (Diesel), Furnace

Stepless heating power control

Optimized water volume flow thanks to controlled water pump allows for faster window de-icing

Can be used with petrol, diesel, E10 and B30

Noise emissions optimized

Higher IP protection rating makes it secure against the ingress of water during high-pressure/steam jet cleaning, provided it is not in operation

Greatly enhanced resistance to salt mist

Rs. 127,700.00

G63 MCS7 Controller Kit

The MCS7 Controller Kit is compatible with Eberspaecher S3 Hydronic CS model heaters only.

Promotional discount codes for existing Rixen customers with MCS6 kits are available by request with an original proof of purchase or a verifiable Eberspaecher Hydronic heater serial number sold through Rixens.

Promotional upgrade discount valued up to 250 USD.

M11-300 MCS7 S3 POWER BOX COMPLETE w/WIFI, Altimeter, Sensor, and Harness

Rs. 88,100.00

S2 Airtronic D2L Diesel Furnace 12 Volt

The successful Eberspächer air heater logically led to the development of the new Airtronic range. The most recent control system and sturdy parts have allowed the Airtronic to expand its functionality and last longer.

As standard, the new Airtronic has automatic altitude adjustment. The service life of the new brushless motor has been increased to 5,000 hours. The acoustics are further enhanced by the use of the newest metering pump technology, a contemporary control system, and this new motor. Moreover, the innovative Eberspächer CAN bus technology is employed by the new Airtronic.

Rs. 115,800.00
