

Is error code 1058-4 related to registry issues?

Error Code 1058-4: [Error code 1058-4](#) occurs when Office 365 Pro Plus is attempting to fetch updates. When you configure manual proxy settings for your users, it doesn't affect the "Local System" account, rather Local System is always set to "Automatically detect settings".

Therefore if it cannot identify the proxy through "Automatically detect settings", the update will fail as the updater process cannot connect to the internet.

Solution For Error Code 1058-4 :

The basic troubleshooting to repair [error code 1058-4](#) is to repair the office program if it fails we need to uninstall and re-install the program.

The necessary steps may be helpful in understanding how to install Office and Uninstall/repair Office programs.

Error Code 1058-4 in Windows 10

1. Press the Windows logo key + X to see a list of commands and options. (Basically, a quick way to get to Programs and Features in Control Panel.)
2. Click Programs and Features.
3. Click the Office program you want to repair, and then click Change.
4. Do one of the following:
 - In Office 2010, click Repair > Continue.

- In Office 2013, click Quick Repair.
